Subject: _____

$$\mathcal{G}(\varphi) = 0.1 \rightarrow \varphi = \mathcal{G}^{-1}(0.1) = 0.1 \cdot \frac{\pi \cdot 180^\circ}{1 \text{ A}^\circ} = 0.4 \pi \text{ rad}$$

$$1 = \frac{V_0}{V_{in}}$$

(۲) حدود نامی است که در خط از صفت شروع می‌شود و به زاید می‌رسد و در بعضی موارد به صفت می‌رسد.

$$KVL: R_i + L \frac{di}{dt} = V_m \sin(\omega t)$$

$$\pi + \alpha \leq \omega \leq \pi + \beta \leftarrow \alpha \leq \omega \leq \beta$$

$$R_{ms} \Rightarrow \left(\frac{1}{\pi} \int_0^{\beta} V_m \sin(\omega t) dt \right)^{\frac{1}{\pi}} = V_m \left(\frac{1}{\pi} \int_0^{\beta} \frac{1 - \cos(\omega t)}{2} dt \right)^{\frac{1}{\pi}}$$

$$= v_m \left[\frac{1}{\pi} \left(\frac{\beta - \alpha}{r} - \left(\frac{\sin(r\beta) - \sin(r\alpha)}{r} \right) \right) \right] \frac{1}{r} \quad \text{for } \tan \theta = 1$$

$$\frac{V_o}{V_{in}} = \frac{1}{\pi} \left(\beta - \alpha - \frac{1}{f} \sin(\alpha - \beta) + \frac{1}{f} \sin(\beta - \alpha) \right) \frac{1}{f} \rightarrow \frac{\omega}{\omega_{cutoff}}$$
