Mid-term Exam: TBD
Final Exam: TBD

Contact

Office: GSME Building, Room #111
Office Hours: By appointment
Phone: (+98)(21) 66049195-6 Ext:139
Email: Ebrahimnejad@Sharif.edu

Course objectives

This course is designed for undergraduate students who are interested in learning about the essential concepts in economics and how they can be applied to real-world issues. The course emphasizes application of key concepts from economics over mathematical proofs. Students can expect to leave this course with a solid understanding of economics and a rigorous framework to analyze novel issues faced in real life.

Course Evaluation

The grading of the course will be based on the following weighting scheme:

Class Participation/Quiz: 20% Assignments: 20% Mid-term exam: 20% Final exam: 20%, Final Project: 20% . Up to 10% of the weighting may be altered if deemed necessary.

The course will be taught in the form of lectures. Assignments must be submitted via Sharif CourseWare (CW). *Late assignments will not be accepted*.

Academic Integrity

Personal integrity is the key to your success in career and life. We will not tolerate any cheating or dishonesty, including plagiarism. If a student is found guilty of academic dishonesty, the student will receive an 'F' for the course in addition to any punishment determined by the university. Failing a course can have serious consequences for your professional and academic career prospects.

Students are allowed to work with other students on homework. However, all the work including problem sets and exams should reflect your work only.

The use of artificial intelligence (AI) tools, such as ChatGPT or other generative models, is permitted only if students disclose its use and ensure that the final submission reflects their own understanding and

effort. Using AI to generate answers without proper attribution or in a way that misrepresents your own work is considered academic dishonesty.

Recommended Readings

Mankiw, Gregory. *Principles of Economics*; 10th Edition. Cengage Learning. (*Main textbook*)

Acemoglu, Daron, David Laibson & John List. Economics; 3rd Edition. Pearson.

مبانی اقتصاد، دکتر مسعود نیلی، نشر نی.

Brinkley, J., Smith, C.W., and Zimmerman, J. 2016. *Managerial Economics and Organizational Architecture,* 6th ed., McGraw-Hill/Irwin.

Begg, David, Stanley Fischer & Rudiger Dornbusch. *Economics*; McGraw-Hill Education.

Course Outline
